

OFFICE OF THE UNDER SECRETARY OF DEFENSE

WASHINGTON, D. C. 20301-2000

POLICY

29 March 1988

MEMORANDUM FOR

CHAIRMAN

INTELLIGENCE INFORMATION HANDLING COMMITTEE

STAT

SUBJECT: Request for Review and Approval of Revised DCID 1/16

In response to last Friday's meeting regarding the subject, please be advised that alternative "B" is recommended primarily because of the agreed policies set forth in DCID 1/7 which are applicable to information generally.

Specifically, this latter DCID specifies that the originator of intelligence information shall be consulted prior to release of the information to foreign nationals if the information has been designated as "NOFORN." It must be asserted that this provision of DCID 1/7 applies equally to information that is contained in automated information systems (AISs) being accessed directly by foreign nationals.

While this constitutes the rationale for my position, I share a common concern about resources. There may well be a hard requirement to seek policy waivers after installation of the enhanced AIS security requirements of DCID 1/16. For example, it may be necessary to seek a waiver that would allow the Director of the Defense Investigative Service to accredit AISs that are processing Secret data that has been labeled as "WNINTEL."
